Problem Statement

Providing a common nomenclature to all the test cases written using different test management tools, in order to make it easier to access them.

Objective

- Different test management tools used within the company as per needs.
- Preferred Cloud version, as per mandate that drove company towards cloud technologies.
- Writing a script to automate the transformation of groovy as well as csv files, including renaming their name and their content.

Scope and Impact

Within Project

Used it to automate the transformation process for other 13,000 test cases, eradicating the tedious process of doing it manually.

Across FIS

Could be used as base script to automate tasks and similar functionality across other FIS products .

Tools & Technologies
